Azure (9) | Python (9) | Google Cloud / Vertex AI (7) | GitHub (6) | AWS (5) | Kubernetes (5)

OFFICIAL AI DISCLOSURES

Advancements in artificial intelligence increase information security risks

Wells Fargo disclosed that recent developments in artificial intelligence have amplified information security risk. Specifically, AI has improved the ability to detect and exploit previously unknown cybersecurity vulnerabilities across various customers and industries.

"recent advancements in artificial intelligence have enhanced the capability to identify and potentially exploit previously unidentified cybersecurity vulnerabilities, contributing to increased information security risk across a range of customers and industries."
